

# Alsaiah Foundation Website Redesign

Board & Internal Presentation

April 2026

# Why We Did This

The previous website was **clean and informational** but it wasn't doing its job.

Visitors could learn about the foundation, but the site didn't answer:

- **What should I do right now?** → No clear primary action
- **What is the actual product?** → App wasn't prominent
- **Why should I care personally?** → Messaging felt institutional
- **Can I trust this?** → No social proof

# The Core Insight

People don't visit our site to read about a nonprofit.  
They come because they want to **grow in their faith**.

Everything we changed flows from one question:

***"How does this help me build a daily relationship with  
God?"***

# Our New Framework

We unified the entire site around **three pillars**:

## The Pillars

**Pray** — connect with God  
daily

**Reflect** — engage with  
Scripture and journal

**Serve** — live faith through  
action

## The Mission (Public-Facing)

Helping people build a daily  
relationship with God  
through prayer, reflection,  
and service.

This line now appears in the

# What Changed: The Homepage

**Before:** 7 generic sections (Hero, Mission, Features, Partnerships, Blog, FAQ, CTA)

**After:** 10 conversion-optimized sections following a proven flow:

| # | Section            | Purpose                            |
|---|--------------------|------------------------------------|
| 1 | Hero               | Hook with problem + solution + CTA |
| 2 | Trust Bar          | Credibility signals                |
| 3 | Value Proposition  | Pray, Reflect, Serve pillars       |
| 4 | Product Experience | Daily rhythm + app showcase        |

# The New Hero

## Before

- Generic tagline: "Turn screen time into sacred time"
- App screenshots with marketing text baked in
- No clear primary call to action

## After

- **Problem-based headline:** "Struggling to stay consistent in your faith?"
- **Clear solution:** prayer, reflection, and service

# Messaging Overhaul

We rewrote copy across **27+ files** and every page on the site.

## Removed

- "Acts" / "Act"
- "Spiritual fitness"
- "Digital infrastructure"
- "Purpose-built technology"

## Replaced With

- **Service / Serve**
- **Spiritual growth**
- Tools for prayer, reflection, service
- (benefit-specific

# Why Consistent Language Matters

When every page uses the same framework, visitors:

1. **Understand faster** — one message, not ten
2. **Remember us** — "prayer, reflection, and service" sticks
3. **Trust us more** — consistency signals intentionality
4. **Tell others** — they know exactly what to say about us

The mission line appears **15+ times** across the site, reinforcing the same message from homepage to footer.

# Every Page Updated

| Page         | Key Change                                     |
|--------------|------------------------------------------------|
| Homepage     | Complete 10-section redesign                   |
| About        | Personal tone, "grow in faith" language        |
| Solutions    | Benefit-driven, "Prayer, Reflection & Service" |
| Partnerships | Community growth outcomes                      |
| Events       | Connected events to spiritual growth + app     |
| Team         | Mission-aligned team descriptions              |
| Board        | Governance tied to prayer, reflection, service |
| Blog         | "Daily spiritual habits" positioning           |
| Contact      | Personal tone, simplified partnership types    |

# Technical Improvements

## Architecture

- **Content separated from UI** — all homepage copy lives in one typed file ( `homepage.ts` )
- **Reusable components** — `AppPreviewCard`, `SectionHeading`, modular sections
- **CMS-ready** — swap content imports with API data when ready

## SEO & AI-Search

# What This Looks Like

## Homepage Hero

3 overlapping app preview cards (Prayer, Reflection, Service) with:

- Center card dominant
- Side cards rotated for depth
- Glow effects behind the stack
- Icon-enhanced CTA buttons

## Conversion Flow

# Before & After: Key Metrics We Expect to Improve

| Metric            | Why                                             |
|-------------------|-------------------------------------------------|
| Time on homepage  | More sections, better content, clearer flow     |
| CTA click-through | Dominant "Download the App" button, repeated 3x |
| Bounce rate       | Emotional hook replaces generic tagline         |
| Partner inquiries | Dedicated community section with clear CTA      |
| Donation          | Trust-focused donation section with             |

# What's Next

## Immediate

1. **Clean app screenshots** — replace placeholder cards with real UI
2. **Real testimonials** — collect 3-5 user quotes
3. **App Store badges** — official Apple/Google download buttons

## Short-Term

4. **Usage metrics** — display download counts and

# The Site Now Communicates One Clear Message

Helping people build a daily relationship with God  
through prayer, reflection, and service.
